11

Objectives:

The main objective of this assignment is to digitalize the detailed socio-economic data of the every single household as well as institution within this municipality so as to facilitate the municipality in decision making, planning and policy development and service delivery. Tilottama Municipality intends to prepare house hold metric system incorporated in Municipal Information System along with the Geographical Information System. At the end of the assignment, municipality expects the consultant/s to deliver a fully developed information system to be used by the municipality office and ward offices with data of households, institutions integrated with the GIS maps.

Tilottama Municipality intends to keep digital records of all households and institutions so as to make the communication with the residents easier and deliver better services in the future to its residents. In addition, the municipality intends to increase the revenue by accurately tracing the tax brackets residents and households fall under and bring all citizens under the tax system.

Scope of the assignment:

1. Conduct socio-economic census of individual households and institutions:

- Use paper/tablet based questionnaire to collect data from every household
- Collect details of residents with pictures as well
- Use paper/tablet based questionnaire to collect data from every institutions
- Collect details of institution with pictures as well
- Document and will be further discussed with the appointed consultant /s.

2. Develop and establish household metric system for each household:

- Provide a unique household ID for each house in the municipality from ward 7 to 17.

3. Prepare thematic resource maps:

- Preparation of thematic resource map from the GIS System of municipality.
- Generate thematic information by conducting spatial analysis.
- Facilitate the municipality by identifying all the natural and man-made resources within the municipality for planning and policy development.
- The map must include but not be limited to climatic information, land parcel and use, heritage sites, hydrology, greenery (parks / community forests), open spaces, cultural and religious places, connectivity (roads / streets), infrastructures, facilities for public, private / public institutions, demographics, social segregation, economic segregation.

4. Prepare large scale urban base map:

- Large scale urban base maps scaled for office uses to be prepared and delivered to the municipality.

- Details of, but not limited to, buildings, private institutions, religious places,
- governmental, semi-governmental and non-governmental organizations, street or road networks, public service delivery offices, water bodies along with details of terrain and topography.

5. GIS data digitization and attribute entry:

- All acquired digital data from the Department of Land Information and Archive as well as field surveyors will be entered into the Municipal GIS to be integrated with the Municipal Information System.
- Multiple levels of validation and quality analysis, to be carried out before finalization.

6. Design and develop Municipal Information System:

- A fully matured and bug free system to be handed over to the Municipality Office with database.
- Hosting and Maintenance for the first year must be included in the quotation then after Annual Maintenance Contract Cost will be maximum of 20 % of Bid Price as per agreement.
- should integrate data from ward 1 to 6.
- User friendly interface with high security and speed must be delivered.

7. Capacitate and institutionalize the municipality office:

- Provide a detailed User Manual for the Municipality Office of the Information System integrated with GIS data and maps.
- Conduct presentation and orientation with all the stakeholders of the municipality and ward offices making them familiar with the system and its utilization.
- Conduct training sessions so as to capacitate the personnel assigned by the municipality to make them well versed with the system developed.

8. Prepare the information system for individual wards of the municipality:

- The Municipality Information System will also be used by Ward Offices with limited privileges and features.
- The system must be able to handle multiple levels of User Accounts and user groups for simultaneous use and with different privileges and hierarchy.

9. A fully scalable information system that can be used for each households to register and update information on their own at later stage:

- The Municipality Information System must be scalable so that in future all residents can login to the system to view their details and update or request for update accordingly.
- The system must be able to take 50,000 or more user accounts.

10. Attach the house numbering number plate to all the households of ward 7 to 17 Approx 17000 houses with standard size printed/painted metal number plate.
